# KFF Health Tracking Poll/ KFF COVID-19 Vaccine Monitor December 2020

#### **METHODOLOGY**

This KFF Health Tracking Poll/ KFF COVID-19 Vaccine Monitor was designed and analyzed by public opinion researchers at the Kaiser Family Foundation (KFF). The survey was conducted November 30- December 8, 2020, among a nationally representative random digit dial telephone sample of 1,676 adults ages 18 and older (including interviews from 298 Hispanic adults and 390 non-Hispanic Black adults), living in the United States, including Alaska and Hawaii (note: persons without a telephone could not be included in the random selection process). Phone numbers used for this study were randomly generated from cell phone and landline sampling frames, with an overlapping frame design, and disproportionate stratification aimed at reaching Hispanic and non-Hispanic Black respondents. The sample also includes interviews completed with respondents who had previously completed an interview on the KFF Tracking Poll (n = 267) or an interview on the SSRS Omnibus poll (and other RDD polls) and identified as Hispanic (n = 80; including 14 in Spanish) or non-Hispanic Black (n=179). Computer-assisted telephone interviews conducted by landline (391) and cell phone (1,285, including 947 who had no landline telephone) were carried out in English and Spanish by SSRS of Glen Mills, PA. To efficiently obtain a sample of lower-income and non-White respondents, the sample also included an oversample of prepaid (pay-as-you-go) telephone numbers (25% of the cell phone sample consisted of prepaid numbers) Both the random digit dial landline and cell phone samples were provided by Marketing Systems Group (MSG). For the landline sample, respondents were selected by asking for the youngest adult male or female currently at home based on a random rotation. If no one of that gender was available, interviewers asked to speak with the youngest adult of the opposite gender. For the cell phone sample, interviews were conducted with the adult who answered the phone. KFF paid for all costs associated with the survey.

The combined landline and cell phone sample was weighted to balance the sample demographics to match estimates for the national population using data from the Census Bureau's 2019 U.S. American Community Survey (ACS), on sex, age, education, race, Hispanic origin, and region, within race-groups, along with data from the 2010 Census on population density. The sample was also weighted to match current patterns of telephone use using data from the January- June 2019 National Health Interview Survey. The weight takes into account the fact that respondents with both a landline and cell phone have a higher probability of selection in the combined sample and also adjusts for the household size for the landline sample, and design modifications, namely, the oversampling of prepaid cell phones and likelihood of non-response for the re-contacted sample. All statistical tests of significance account for the effect of weighting.

The margin of sampling error including the design effect for the full sample is plus or minus 3 percentage points. Numbers of respondents and margins of sampling error for key subgroups are shown in the table below. For results based on other subgroups, the margin of sampling error may be higher. Sample sizes and margins of sampling error for other subgroups are available by request. Note that sampling error is only one of many potential sources of error in this or any other public opinion poll. #### Notes for reading the topline:

- Percentages may not always add up to 100 percent due to rounding.
- Values less than 0.5 percent are indicated by an asterisk (\*).
- "Vol." indicates a response was volunteered by the respondent, not offered as an explicit choice
- Questions are presented in the order asked; question numbers may not be sequential.

ACA. As you may know a health reform bill was signed into law in 2010, known commonly as the Affordable Care Act or Obamacare. Given what you know about the health reform law, do you have a generally (favorable) or generally (unfavorable) opinion of it? [GET ANSWER THEN ASK: Is that a very (favorable/unfavorable) or somewhat (favorable/unfavorable) opinion?]

<sup>&</sup>lt;sup>4</sup> April 2010 trend wording was "President Obama did sign a health reform bill into law last month...Given what you know about the new health reform law, do you have a generally (favorable) or generally (unfavorable) opinion of it? (Is that a very favorable/unfavorable or somewhat favorable/unfavorable opinion?)"

<sup>5</sup> Don't know and Refused were recorded separately for this question and some other questions throughout the survey. Prior to October 2016, Don't know/Refused was combined into one category. Trend results prior to 2016 for "Refused" are shown in the "Don't know" category.

<sup>&</sup>lt;sup>6</sup> November 2016 question wording was "What would you like to see President-elect Donald Trump and the next Congress do when it comes to the health care law? Expand what the law does, move forward with implementing the law as it is, scale back what the law does, or repeal the entire law?"

<sup>7</sup> October 2016 question wording was "What would you like to see the next president and Congress do when it comes to the health care law?"

<sup>8</sup> November 2014 to April 2016 question wording was "What would you like to see Congress do when it comes to the health care law?"

Q2. I'm going to read you some different health care proposals. For each one, please say whether you (favor) or (oppose) this proposal. First (ITEM). Do you (favor) or (oppose) this proposal?
